2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

1. Reference is made to the following document:

D1: WO-A-8301203

2. Document D1, which is considered to represent the most relevant state of the art, discloses a cubic logic toy from which the subject-matter of claim 1 differs in that between the external planar surfaces and the internal concentric spherical surfaces, conical sphenoid shaped structures are provided, instead of the intermediate "tongue-groove" structures (20, 28, 32), which are sections of a spherical shell, disclosed in D1.

The subject-matter of **claim 1** is therefore novel (Article 33(2) PCT).

Since the internal parts of the several separate pieces are conical and spherical, they can easily rotate in and above conical and spherical surfaces, which are surfaces made by rotation, and consequently ensure a fast and unhindered rotation. The aforementioned distinguishing features are therefore considered as involving an inventive step (Article 33(3) PCT).

3. **Claims 2 to 12** are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
4. The industrial applicability of **claims 1 to 12** is self-evident (Art. 33(4) PCT).
